Do I need a 3-phase battery backup?

Perhaps Wiring Will Decide Your Needs. Where you may need 3-phase backup from a battery is if you have a specific 3-phase load, like a fire pump, or if the wiring in your premises covers different floors. Segregating backup circuits can be difficult or impossible if 3 phases feed three different buildings, for instance.

Do you need a 3 phase battery?

Three-phase loads are generally large appliances like; You need a large and expensive home battery to meet these challenging loads without the grid. Everything else in your house is single-phase, and in many cases, even large air conditioners can be single-phase units. Many EVs (including all BYDs) only have single-phase charging too.

I had a 3 phase supply and a small by today's standards 3.4kW system on only 1 phase installed in 2011. When the time came to upgrade the solar in Feb 2023, I decided to drop to a single phase system (2 of the 3x 25mm² XLPE cables disconnected behind the meter) as all the 3 phase inverter and battery options seemed too prohibitively expensive.
