

40kw solar system price Antigua and Barbuda

What is a 40kW Solar System?

These are complete PV power systems that can work for a home or business, with everything you need to get the system up and running. The kits include hardware components only; does NOT include labor. A 40kW Solar Kit can require over 2,300 square feet of space. This 40kW system provides 40,000 watts of DC direct current power.

What is a 40kW grid-connect solar system?

These 40kW size grid-connect solar kits include solar panels, string inverter, and the racking system for a ground mount. These are complete PV power systems that can work for a home or business, with everything you need to get the system up and running. The kits include hardware components only; does NOT include labor.

How much does it cost to install a solar system?

All these items can be purchased at any electrical supply shop, Home Depot or Lowe's, and will typically cost \$1,500 or more for larger systems. Our technical support representative will provide a shopping list once your plans are complete. How easy is it to install? You can install an 8kW ground-mounted solar system in two or three weekends.

How much space does a 40kW Solar System need?

A 40kW Solar Kit can require over 2,300 square feet of space. This 40kW system provides 40,000 watts of DC direct current power. This could produce an estimated 3,200 to 5,600 kilowatt hours (kWh) of alternating current (AC) power per month, assuming at least 5 sun hours per day with the solar array facing South.

How long does it take to install an 8kW Solar System?

You can install an 8kW ground-mounted solar system in two or three weekends. Our kits use industry leading solar panels, inverter, optimizers, and racking systems specifically selected and combined to make do-it-yourself installation possible.
