2. Saving Money: Adding storage to an existing grid-tied residential solar power system reduces your dependence on your utility and helps ensure you maximise your return on investment. If you're ineligible for the Feed-In Tariff scheme or Smart Export Guarantee, any excess electricity your solar panels generate during daylight hours will simply go to waste without battery storage.

2 ???#0183; Adding a battery to your existing solar system is an excellent way to enhance energy independence, maximize self-consumption, and increase resilience. However, it's crucial to assess compatibility, consider factors such as cost and energy needs, and consult with a solar professional before making a decision.

In summary, adding a battery to an existing solar power system in the UK is a viable and beneficial option for homeowners looking to enhance their solar energy utilisation. With the right planning, installation, and maintenance, a solar battery can significantly increase the efficiency and independence of your solar power system.

Adding a battery backup to an existing solar power system enhances energy independence and resilience by storing excess generated electricity for later use. This upgrade can ensure uninterrupted power during outages and maximize self-consumption of solar energy.

I have a current 5.8kw solar system installed on a south facing roof that was installed in 2015. Hardware includes. Sunpower E20-327 x 18 panels SMA SB 5000TL-US-22 String Inverter I am looking for advice/recommendations on adding a Battery Backup/Storage unit to become less dependent on the grid.

It's limited to 500 ah bank for the 100 Ah batteries. So that should be fine for 400 ah bank. Not sure how I'm going to manage balancing all batteries as I am off grid and reliant on existing batteries. I wouldn't be able to take it offline for long. My idea was to charge the new batteries one by one then add them when the bank is fully charged.
