Why are oil and natural gas production rising in Argentina?

Crude oil and natural gas production in Argentina are both nearing record highs, driven by increasing output from the Vaca Muerta shale formation, which is offsetting declining output from conventional oil and natural gas fields.

Where can oil be used in Buenos Aires?

The project will make it possible to supply oil to the export port of Puerto Rosales in eastern Argentina, as well as to refineries in the cities of Luján de Cuyo (Mendoza Province), La Plata (Buenos Aires Province) and Plaza Huincul (Neuquén Province). Argentina is a major oil exporter in the region.

How much oil does Argentina produce per day?

In September 2024, production averaged 738,000 barrels per day (b/d) of crude oil in Argentina, 15% more than in September 2023 and the most in any month since 2003. In September, oil produced in the Vaca Muerta formation accounted for 58% of the country's total output, according to SESCO.

Will YPF and Shell develop liquefied natural gas in Argentina?

Argentina's state-run oil company YPF and oil major Shell signed an agreement to develop the country's flagship liquefied natural gas (LNG) project, the companies said on Thursday.

Does Vaca Muerta increase oil production in Argentina?

Thanks to the development of Vaca Muerta, the share of unconventional reserves in Argentina's oil production went up from 17% in 2019 to 34% in 2023.

Why did Argentina's natural gas imports fall 47% in 2024?

Argentina's natural gas imports via pipeline fell by 47% in the first nine months of 2024 compared with the same period in 2023. The decline was largely because pipeline imports from Bolivia, which made up around half of Argentina's natural gas imports in 2023, ended in September 2024.

Argentina: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

From our office in Buenos Aires, Argentina we serve the regional market, offering a wide range of services including the supply of fuels, predominantly diesel and gasoline. We work closely with our customers to identify regional market opportunities and are able to offer them advice and administrative support, including coordinating with customs.
