

What is energy in Qatar?

Energy in Qatar describes energy production, consumption, and policies of the State of Qatar. The International Monetary Fund ranked Qatar as having the fifth highest GDP per capita in 2016 with a 60,787 USD per capita nominal GDP over a population of 2.421 million inhabitants.

Does Qatar use natural gas?

Since 2007, natural gas production in Qatar has significantly increased and is the primary fuel chosen for energy consumption within Qatar. In 2014, Qatar ranked as the fourth highest natural gas producer worldwide.

Qatar's energy consumption in 2016 was 34.00 billion kilowatt-hours (kWh), which is an average of 15,056 kWh per capita.

Why does Qatar use a lot of oil?

This is due to Qatar's limited resources related to agriculture, forestry, and fishing since it has primarily desert terrain. And while oil consumption for energy usage has quadrupled since 2000, the proportions for which each sector consumes oil has been consistent. Petrochemical plant in Mesaieed Industrial Area.

How much oil does Qatar have?

Qatar's first oil discovery was made in late 1930s with oil deposits found in Dukhan field. Since then, Qatar claims to have 1.5% of global oil reserves, while producing 2% of the global oil economy. In 2015, Qatar was ranked as the 17th top producer of crude oil worldwide at an approximate 1.532 million bbl/day.

How does Qatar maintain economic prosperity?

For sustaining economic prosperity, Qatar aims to: diversify the economy and encourage a culture of innovation and discovery. These objectives were created under the notion that Qatar's hydrocarbon income will continue to decrease in response to the increase in renewable energy technologies and depletion of oil resources.

How do I contact Qatar energy if a communication is a scam?

If in doubt about the legitimacy of a communication, you can contact speakup@qatarenergy.qa. Further information can be found at our fraud and scam webpage or vendor scam webpage, where you can also report any suspicious activity. Delivering the cleaner energy that the world needs.
