Solar panels are installed on a roof of a building (or anywhere where there is direct sunlight and less shading) to capture the sun's light energy and converts to (DC/ direct current) electricity. ... Island Solar is based in Nassau, Bahamas ...

A: Yes you can, but not separately from other appliances or loads in your house. The way so called grid-tied systems connect to your house is in your electrical service panel. This means that all your loads, lights, appliances and everything using electricity is powered by your solar system as long as there is enough energy from the panels.
