Calgary-based Novus Earth is looking to harness geothermal energy to generate electricity and use it for growing food in a hydroponic farm in Hinton, 290 kilometres west of Edmonton.

The company harnesses geothermal energy to produce renewable baseload power and heat and provides a zero-carbon energy remedy to cost-effectively grow food through vertical aquaponics, enabling industries to utilize decarbonized technologies that enable sustainable stewardship of the earth's resources.

The team at Novus Earth Energy is excited to share our selection by #PNPTCALberta as one of 18 startups selected for the fourth cohort of their Sustainability program! The Plug and Play ...

Walter Roban, the Minister of Home Affairs, said the Electricity Amendment Act 2024 would create a bulk generation sole-use installation licence, allowing holders to generate more than 500kW of ...

Novus Earth, based in Alberta, is a company dedicated to providing sustainable renewable energy solutions for real-world problems. They focus on decarbonizing for a brighter tomorrow by offering clean baseload power through closed-loop geothermal systems that are scalable and environmentally friendly.

Novus Earth Energy invites you to get to know our team! This week we would like to introduce you to Toby Bird, our leader in Investor Relations -- and on the... | 13 comments on LinkedIn

The facility will feature state-of-the-art vertical farming systems, leveraging Novus Earth's geothermal energy solutions to provide a sustainable and reliable source of heat and power. Construction of the GeoCEA facility is expected to commence in the later half of 2023, with plans for full operation by Summer 2024.

Development on the Latitude 53 project began a few years ago as a new geothermal energy extraction operation coming to Hinton. It is now preparing to combine that into a vertical farm now that Alberta Energy gave Novus Earth Energy Operations the go-ahead with approval with subsurface geothermal rights.
