How much electricity does Afghanistan buy from Uzbekistan?

Afghanistan purchases as much as 450 MW of electricity from Uzbekistan. Discussions on electricity supplies began in 2006, and then the construction of a 442-kilometre (275 mi) high voltage transmission line from Uzbekistan to Afghanistan was completed in 2008.

How much electricity does Afghanistan import?

Afghanistan currently imports over 670 MW of electricity from neighboring Iran, Tajikistan, Turkmenistan and Uzbekistan. This costs Afghanistan between \$250 and \$280 million annually. Afghanistan's western provinces have long purchased electricity from eastern Iran.

Where does electricity come from in Afghanistan?

It runs from Kabul through five Afghan provinces towards the country's border with Uzbekistan, and connects to the Uzbek electricity transmission system. By 2009 residents of Kabul were enjoying 24-hour electricity. Crude oil and natural gas

Can Afghanistan meet its own energy needs?

With these resources, Afghanistan has the potential not only to meet its own energy demands but also to export surplus energy to other South Asian nations. However, it has only limited capacity to draw benefits from its resources. In the absence of sufficient hydropower projects, its river waters end up flowing into neighboring countries.

How much biogas can Afghanistan produce a year?

Theoretically, Afghanistan has the potential to produce about 1,400 million cubic meters of biogas annually. A quarter of this amount could meet half of Afghanistan's energy needs, according to a January 2011 report from the United States National Renewable Energy Laboratory.

What are alternative energy sources in Afghanistan?

The Afghan National Development Strategy has identified alternative energy, such as wind and solar energy, as a high value power source to develop. As a result, a number of solar and wind farms have been established, with more currently under development.
