

What is the role of energy transformation in Cameroon?

How is energy used in Cameroon? Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Who generates electricity in Cameroon?

Presently, Electricity is generated by independent power producers (IPPs) and Energy of Cameroon (ENEO) (the latter also doubling as the sole distributor), to consumers over a transmission network managed by National Electricity Transmission Company (SONATREL).

Why did Cameroon merge enelcam and EDC?

The need to harmonize power sector activities in the country led to the merging of ENELCAM and Electricit#233; du Cameroon (EDC) (another utility created in 1963) to form the state-owned Cameroon National Electricity Company (SONEL) in 1973. SONEL was mandated to manage power generation, transmission and distribution solely.

Which companies are involved in oil production in Cameroon?

However, some isolated trials have been undertaken by some Cameroonian companies such as the Cameroon Development Corporation (CDC), SOSUCAM, SODECOTON, MAISCAM and SOCAPALM. The government together with some foreign capitals supported the industrial production of oil palm at 5000 ha/year, aiming to produce 250,000 t of oil in 2010.

What energy resources does Cameroon have?

Cameroon has an abundant reserve of energy resources, such as crude oil, natural gas, hydropower, biomass, solar, wind and geothermal energies. However, these resources are still weakly valorised.

How big is Cameroon's energy demand?

From the results, it is observed that the generation capacity would reach 10.52 GW under the REF scenario, indicating a growth of over 800% between 2016 and 2045, and Cameroon's high future demand. Despite the nation's energy diversification and security initiatives, large hydropower continues to be a major contributor under all four scenarios.

There is significant geothermal energy due to the Cameroon volcanic line, offshore wind and tidal energy. However, these are not considered due to their "unfavorable" tag in the government masterplan. Cameroon is not a coal producer, and given the need to reduce emissions and ensure energy security, it is not considered a generation option.
