

Cayman Islands micro grid tie

If your system is at capacity, or getting too many shades, another option is to get panels with a micro grid tie inverter for each of them, that you could just connect to your off-grid AC circuitry. That way shades on one panel does not reduce down your whole system production, you don't have to invest on thicker wire for panels.

Micro inverters convert the DC output of each module in a grid-tie system to AC, replacing the dangerously high DC voltages with comparatively lower AC potentials and a greatly simplified system design. The micro inverter output connects directly to the breakers in the AC load center using conventional wiring. Meters and Monitoring
