What is premium tower?

Premium Tower offers scalability of up to 7.5 MW and delivers unbeatable energy efficiency in a robust and compact design. The flexibility in the number of battery blocks (20 to 50) allows the system designer to optimize costs vs autonomy time.

Why should you choose premium tower?

Minimized footprint (save of valuable floor space). Premium Tower optimizes valuable floor space, from 0.29 m² (for 10 - 60 kW) to 0.6 m² (for 250 kW), internal battery options (10 - 60 kW) eliminate the cost of additional battery cabinets and simplifies the installation. Swiss Quality.

What is the short circuit capacity of premium Tower TM?

With a Short Circuit Capability of 3 times nominal current (3 x I_n), Premium Tower (TM) is able to clear output circuit protection in milliseconds. Internal Isolation Transformer

Premium Tower(TM) Highly scalable, unbeatable efficiency and compact design. From 10 to 250kW, PremiumTower(TM) provides the best solution for small and medium data centers, comms rooms, IT networks and any mission-critical application demanding high availability and unbeatable energy efficiency with 120% continuous operation in overload capacity.

Two Centiel PremiumTowerTM 500kW UPSs, one supported by Hoppecke batteries and the other using existing 108 Fiamm batteries, now provide five five- minute backups for the plant's heavy-duty machining equipment. In 2023, a further four PremiumTower UPSs were replaced to ensure continuous power backup at both sites.

A new CENTIEL Premium Tower 30kVA UPS would run at 97% efficiency. We were able to calculate - with the cost of a system typically running at £0.12p/KWH of power - an annual energy saving equating to £1,874.32 over both UPS.
