Will China reshape the distributed-generation solar market?

China's National Energy Administration (NEA) has released new draft rules to reshape the distributed-generation solar market. China's NEA has released "Draft Management Measures for Distributed Solar Power Development and Construction, Edition for Public Consultation."

Will China's Nea reshape the distributed solar sector?

China's NEA has released "Draft Management Measures for Distributed Solar Power Development and Construction, Edition for Public Consultation." The draft guidelines are designed to reshape the country's distributed solar sector. They will be open for feedback from Oct. 9 to Nov. 8, 2024.

How much solar power did China add in 2023?

The nation added 216.88 GW of new PV capacity in 2023, up 148.12% increase from 2022. In 2022, the country added 87.41 GW of solar. According to the NEA's figures, China deployed around 163.88 GW in the first 11 months of 2023 and around 53 GW in December alone.

How big is China's new solar power plant?

Currently, over half of the nation's new installations of power generators are photovoltaic facilities. The surge prompted the CPIA to revise its projections for China's new PV installations this year, raising the forecast from an initial range of 120-140 GW to 160-180 GW. "China's solar power global market share has exceeded 80 percent.

How many solar panels did China install in 2022?

In 2022, the country added 87.41 GW of solar. According to the NEA's figures, China deployed around 163.88 GW in the first 11 months of 2023 and around 53 GW in December alone. The NEA said investments in the Chinese PV market totaled CNY 670 billion (\$94.4 billion) in 2023.

How much solar power does the NEA have in 2022?

Impressively, this capacity marked a new high and constituted over 50 percent of national power generation installed capacity, said the National Energy Administration. Solar power alone reached 557.6 million kW as of the end of November, significantly exceeding the NEA's year-end target of approximately 490 million kW set in 2022.
