

Climatenza solar Kazakhstan

Climatenza aims to provide 25% more efficient solutions that will be 40% more frugal compared to our customers. We are fixated on providing cost-efficacious energy preserving solutions and renewable energy systems (PV) and keenly intellectual solar street lights that will be highly efficient and cost-efficacious.

CLIMATENZA is developing a carbon neutral company and considers the fight against climate change a strategic priority. Through electricity generation from solar thermal sources, it helps mitigate climate change by displacing fossil fuels in the electricity mix.

CLIMATENZA is accelerating deployment of Solar Thermal Technology. Our commitment to renewable energy features a growing solar business. Our expertise as one of the leading solar thermal power project developers has uniquely prepared us to develop and deliver high-value solar technology solutions in developing economies

Our innovative solar thermal technology provide high-value energy to utilities and heat for Industrial applications. CLIMATENZA develops and applies technologies to generate electricity from the sun, working to limit climate change and to develop local communities using mostly concentrating solar thermal technologies.

At CLIMATENZA Solar, we envision a future where solar heat, a virtually limitless and clean resource, revolutionizes cement manufacturing. Our Ground breaking, cutting-edge solar thermal ...

[https://](#) Mission Statement: Climatenza's focus on decarbonizing heat in industrial applications is inherently tied to our mission to help Industries achieve Net Zero targets. By harnessing solar thermal energy, Climatenza aims to cover a significant portion (40%) of the industrial heat demand.

CLIMATENZA SOLAR PRIVATE LIMITED is a Private Limited Company and was incorporated on Aug 19, 2018 in India. Its corporate identification number is (CIN) U93000DL2018PTC337658 and its current status is Active. Entity Details. CIN U93000DL2018PTC337658. Current Legal Name CLIMATENZA SOLAR PRIVATE LIMITED.

CLIMATENZA is an Indo-Chilean based solar thermal company that develops and applies solar CSP technology to generate high-value energy for industrial applications directly from the sun. CLIMATENZA promotes, supplies and supports Concentrated Solar Thermal (CST) technology for the development of cost-competitive, highly efficient and low-medium ...

CLIMATENZA, a solar thermal company based out of Chile and India has innovated next generation solar thermal technology which is 30% cheap and highly efficient compared to state-of-the-art technologies. We

Climatenza solar Kazakhstan

aim to become leading global developer of utility-scale solar power projects, which include electricity generation by solar thermal energy. ...

Climatenza Solar Private Limited (CSPL) is a registered startup operating as a Private Limited Indian Non-Government Company incorporated in India on 20 August 2018 (Six years and two months 21 days old). Its registered office is in Delhi, Delhi, India. The Corporate was formerly known as Cleantrough Private Limited.

Akshay Makar founded Climatenza, a solar thermal company working in India and Chile that develops and applies concentrated solar power technology to generate clean and high-value energy for industrial applications. Akshay's clean energy solution can replace carbon-intensive fossil-fuel technology used in industry and manufacturing.

With the support of bp mentors experienced in clean energy ventures, Climatenza is preparing to launch a fundraising round in 2021 or seek a partner through which to scale their operations. Within the next five years, Climatenza aims to build and operate solar thermal projects with a combined scale of 55.5 MW.

Who is CLIMATENZA Solar? Our mission is to create a sustainable Planet by innovating Concentrated solar solutions for sustainable development that contribute to social and environmental well-being. CLIMATENZA is accelerating ...

(March 22, 2023) "39 of the world's 50 most polluted cities are in India" made headlines the day Climatenza Solar founder Akshay Makar sat for an interview with Global Indian was exactly such headlines that prompted Akshay to work in the climate and clean energy space. "Whenever you see the newspaper, India always makes it to the top 10 most polluted cities.

Climatenza Solar is winning in Indian market because of 3 major advantages. India is a price-sensitive market and it is critical to provide efficient technology at competitive price. Due to this, Climatenza is mass-manufacturing in India and developing our local supply chains. We have seen the impact of this where the prices have fallen by 48% ...

CLIMATENZA focuses on decarbonizing the industrial sector through concentrated solar thermal technology. Use the CB Insights Platform to explore CLIMATENZA's full profile. ... The company offers next-generation solar thermal solutions designed to provide smart climate control and heating for industrial applications. These solutions aim to ...

CLIMATENZA is a solar thermal company that applies innovative technology solutions for sustainability in energy. Its technology provides high-value energy to utilities and heat for Industrial applications. The company develops and applies technologies to generate electricity from the sun, operating to limit climate change and to develop local ...
