How can commercial building owners benefit from solar energy?

Commercial building owners can benefit from solar energy in more ways than one. Solar is a great way for your new construction and retrofit projects to gain LEED credits- as well as reduce future energy costs.

Is solar a good investment for a commercial building?

Solar is a great way for your new construction and retrofit projects to gain LEED credits- as well as reduce future energy costs. To a commercial building owner, this means maximizing output and dollar savings each month when compared to your current electric utility company.

Why should you choose California Commercial Solar?

California Commercial Solar is a smart choice because it simplifies the entire process for clients. By having companies bid against each other, we're able to present better solutions and compete for your business. We take pride in educating our clients about every option the solar industry has to offer, rather than limiting them to one way of going solar.

Does commercial solar save money?

Besides the obvious impact on dollar savings, facility managers will be able to predict electric costs over the 30-40 year lifespan of their solar energy system. Commercial and industrial solar can reduce or eliminate many operational costs for building owners. Learn how we can help with your commercial solar installation.

Why do commercial buildings need solar?

The rise of the solar revolution has increased the demand for solar-equipped commercial buildings. Studies show that the installation of solar systems in commercial buildings increases their business value in comparison to those not having it. California Commercial Solar simplifies the entire process of installing solar systems in commercial buildings.

Why should a commercial construction company use Coldwell solar?

For almost every kind of commercial construction project, Coldwell Solar can help set your business apart from the competition. It can also generate positive public relations by integrating a high-performance solar energy system. Budget and timeline can be sensitive subjects for architects and general contractors.
