

What are solar panels used for in Cyprus?

Solar panels in Cyprus are used for residential, industrial and commercial properties. Other than home use, many businesses install photovoltaic panels in Cyprus for self-consumption. That is, they use the energy the photovoltaic system generates directly, but cannot store any excess energy for following months.

How much does it cost to install solar panels in Cyprus?

The average price of installing solar panels has dramatically dropped over the last decade to almost 90%, allowing more people to afford such an investment. In Cyprus, it is estimated that it takes about 1.5 to 4 for the investment to pay off. The final price heavily depends on the specifications of your project and your needs.

Does Cyprus support photovoltaic systems?

The government of Cyprus, along with the RES and Energy Conservation Fund, offers support schemes for the installation of photovoltaic systems. This is because solar power is considered to be the future of energy and promoting the use of renewable energy sources is a priority.

How long do photovoltaic panels last in Cyprus?

Photovoltaic panels in Cyprus require minimum maintenance. The lifespan of photovoltaic panels in Cyprus can reach 25 years. The real estate market in Cyprus, has shifted towards sustainability and the photovoltaic systems play a huge role in adding extra value to properties.

Who can apply for a solar panel project in Cyprus?

Any homeowner who has been living in Cyprus for at least six consecutive months and who are listed in the tariff code can apply for a household solar panel project. The net-metering contract between a homeowner and the EAC typically lasts 15 years and it is extended in accordance with the pertinent laws in effect at the time.

What is a solar pump in Cyprus?

Solar pumps in Cyprus are pumps that work with the energy generated by solar panels. Solar pump maintenance is very important to ensure that the system works as it should and that the water is clean.
