What is the first solar-plus-storage project in the Dominican Republic?

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS). The Comisi#243;n Nacional De Energia (CNE) of the Dominican Republic announced the start of work on the Dominicana Azul solar project shortly in late December (22 December).

What is the future of Bess in Latin America?

To provide a view of what is to come, AMI breaks down the status and opportunities of BESS in main Latin American markets. Chile passed an energy storage and electromobility bill in late 2022, making stand-alone storage projects profitable for operators.

Does Peru have a Bess regulation?

Peru has no existing BESS regulation and is currently evaluating how to move forward with battery storage projects. In fact, in January 2024, Peru's energy and mining investment regulator, Osinergmin, opened a request for a proposal for a study on energy storage.

What is Bess & how does it work?

BESS is not defined by law but rather by the market. Storage projects must register as an active plant ("central electrica") and be represented by a market participant, in this case, a generator. Hence, they pay transmission and other charges, making stand-alone projects unprofitable. However, the next elected President may change that...

Will a PPA add Bess in Puerto Rico?

Under ASAP, IPPs with existing PPAs with Puerto Rico's Power Authority (PREPA) would add BESS at their locations "on an accelerated basis," leading to an estimated 380 MW of additional contracted BESS capacity by 2026. 3 Peru has no existing BESS regulation and is currently evaluating how to move forward with battery storage projects.

Does Mexico have a Bess market?

Mexico's FTM BESS market is practically nonexistent. BESS is not defined by law but rather by the market. Storage projects must register as an active plant ("central electrica") and be represented by a market participant, in this case, a generator. Hence, they pay transmission and other charges, making stand-alone projects unprofitable.
