

# El Salvador solar energy supplier

How much solar power does El Salvador have?

From pv magazine LatAm El Salvador's energy regular, SIGET, said this week that the country's total installed PV capacity reached 633 MW by the end of 2023. The nation's total installed power generation capacity now stands at 2.99 GW, with 638 MW from hydropower. Solar accounts for about 21.1% of the nation's electricity mix.

When will El Salvador start building a solar park?

El Salvador's Lempa River Hydroelectric Executive Commission (CEL) has started building a 17 MW solar park. It is the first to be owned, designed, planned and executed by the national authorities. It is scheduled to start operations in December 2023. Envisioned layout of the Talnique solar park in El Salvador.

Why should you choose AES El Salvador?

In an increasingly demanding and competitive world, at AES El Salvador, together with our people, our customers, communities and partners, we continue accelerating a safer, sustainable and intelligent energy future to improve the life of all Salvadorans. Accelerating the future of energy, together. Safety is at the core of everything we do.

Where is El Salvador's first solar park located?

Envisioned layout of the Talnique solar park in El Salvador. The state of El Salvador has started building the country's first publicly owned solar park. It is being installed in the municipality of Talnique, La Libertad department. It will have an installed capacity of 17 MW, with operations expected to start in December 2023.

El Salvador's masterplan for renewable energy development indicates that up to 682MW of renewable capacity could be added by 2026. This would be comprised of approximately 160MW of small hydro, 200MW of solar thermal, 90MW of solar PV, 60MW of wind and 60+MW of geothermal along with smaller capacities of biomass and biogas.

Supplying the future of energy with AES. We're selective about our partners and only work together with suppliers who share our values and mission. If your company provides innovative, reliable and cost-effective solutions consistent ...

Solar photovoltaic plant supply and installation services. We innovate with solar photovoltaic plant design, engineering, supply and construction services, contributing to the diversification of the energy matrix in our country and to environmental sustainability.

We accompany the transition towards a sustainable energy future thanks to our Solutions business line, through which we implement important efficient public lighting projects for the industrial and commercial sectors, solar generation for ...
