We offer a broad range of energy attenuation devices to meet the specific needs of your project. Our crash cushions, sand barrels, truck/trailer mounted attenuators, barriers and water-filled channelizing devices help keep motorists safe and structures intact in the event of a collision.

The Safe-Hit<sup>®</sup> Delineator Post is constructed of flexible and durable co-extruded polyethylene with ultraviolet inhibitors. It is self-certified as a NCHRP Report 350 and MASH Category 1 Device, and tested to NTPEP. It can be configured to MUTCD requirements for delineators or channelizing devices. The Safe-Hit<sup>®</sup> Delineator Post is ideal for roadside or lane line ...

The proposed energy absorption system can be attached in the front overhang of the vehicle, which comprises of a bumper, magneto-rheological absorber (MRA), friction spring, and piston-cylinder with shear plate assembly (PCSPA). 1 These components are arranged in series where in, MRA plays a vital role as it transforms passive system in to semi ...

Valtir has been an industry leader and global supplier of highway safety products for over 50 years. Our core roadway product lines include guardrail, end terminals, cable and steel longitudinal barriers, crash cushions, truck and trailer-mounted attenuators, water-filled barricades, sign supports, and delineators.

Energy Absorption Systems, Inc. has been leading the way through innovative and cutting-edge technological breakthroughs in crash cushion impact protection for highway, work zone safety, and highway railroad intersections (HRI) since 1969. Crash cushion systems have been installed in all 50 states and in 60 countries.
