How can Bolivia improve energy production?

Bolivia continues to make efforts to upgrade the infrastructure needed for renewable energy production. The National Interconnected System (SIN), which the government has put in place, aims to improve the nation's capacity for producing electricity by building additional power plants, transmission lines and substations.

Who is responsible for alternative energy in Bolivia?

This brief benefited from valuable comments by the following reviewer: Raúl Villarroel Barrientos, Responsible for Alternative Energy, Ministry for Hydrocarbons and Energy, Bolivia. This publication and the material featured herein are provided "as is", for informational purposes.

Who regulates the energy industry in Bolivia?

The AJAM (Autoridad Jurisdiccional Administrativa Minera) is responsible for permitting and exploration licenses. The main regulatory bodies in Bolivia are: AE (Authority of Fiscalization and Social Control of Energy), the Vice Ministry of Electricity and Alternative Energy, and the Vice Ministry of High Energy Technologies.

Bolivia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
