Will Eskom change its electricity pricing structure?

Eskom, South Africa's embattled power utility, is pushing for significant changes to its electricity pricing structure, which would drastically increase the monthly costs for households using solar power.

Will Eskom's radical electricity pricing changes affect solar power?

Eskom's proposals for radical electricity pricing changes would result in many households with lower consumption -- including those with solar power -- paying substantially more for electricity than they do now.

How will Eskom tariffs affect your electricity bill?

A recent analysis by MyBroadband shows the potential impact of these tariffs on Eskom customers. Households consuming no electricity could see a 321% increase in their bill, while those using only 100 kWh per month might face a monthly cost hike of approximately 130%.

How will solar power affect Eskom?

Solar households, which rely on self-generated power and consume less from Eskom, would therefore be disproportionately affected, potentially paying much more than they do now simply to maintain a grid connection.

Will Eskom's proposed tariff plan increase electricity prices in South Africa?

Eskom emphasised that the proposed changes will not generate additional revenue beyond what has already been approved for the 2024/25 period, ensuring no major price hikes. Eskom's proposed Retail Tariff Plan could dramatically change how South Africans pay for electricity.

How will Eskom's new solar tariffs affect low-consumption users?

As it stands, Eskom acknowledges that these proposed fixed charges would significantly impact low-consumption users, including those with solar installations. In its latest tariff revision, Eskom conceded that households using less than 900 kWh per month would face considerable cost increases.

Upcoming Adjustments to Eskom's Electricity Prices for 2024/25 Eskom has announced an imminent electricity price hike of 12% for the 2024/25 fiscal year, set to take effect on Monday, April 1st. In a bid to adjust its pricing structure and address financial challenges, Eskom submitted its Retail Tariff and Structural Adjustment Application (ERTSA), along with...
