

What is energy in Belarus?

Energy in Belarus describes energy and electricity production, consumption and import in Belarus. Belarus is a net energy importer. According to IEA, the energy import vastly exceeded the energy production in 2015, describing Belarus as one of the world's least energy sufficient countries in the world. Belarus is very dependent on Russia.

Is Belarus a net energy importer?

Belarus is a net energy importer. According to IEA, the energy import vastly exceeded the energy production in 2015, describing Belarus as one of the world's least energy sufficient countries in the world. Belarus is very dependent on Russia.

How much does gas cost in Belarus?

As proof, Lukashenko notes that gas in Russia's Smolensk Oblast, which borders Belarus, costs only \$70 per 1,000 cubic meters. Since Belarus and Russia's first energy spat in 2004, Gazprom has increased Belarus's gas prices to near the bottom of the range it charges European countries, minus delivery costs.

Does Russia need Belarus's energy-transit link to Europe?

Despite plans to bring the Nord Stream Two and TurkStream gas pipelines online in the near future, for now Russia continues to need Belarus's energy-transit link to Europe. This will remain the case unless major geopolitical changes envelop the region or there is regime change in Minsk or Moscow.

Why does Belarus import Russian gas?

Belarus has no domestic oil or gas reserves to speak of, but its economy is highly energy-intensive. So it has no choice but to import Russian gas, since it is the cheapest available. Russia gave Belarus a huge price discount until their first energy dispute in 2004. But Gazprom has increased the price of Belarus's supply several times since then.

Is Belarus a natural gas producer?

And while not a natural gas producer, it delivers the fuel to numerous countries via pipelines built during Soviet times. Its unique situation stems from Belarus's location next to its nearly sole energy supplier, Russia, and the fact that its economy is heavily based on these hydrocarbon resources.

Amidst a perfect storm of conditions leading to increased gas prices and greater demand, Russia is leveraging its role as a major energy supplier to put pressure on Europe. As Benjamin Schmitt notes below, the crisis has been brewing due to "a colder-than-normal spring, calmer-than-normal summer (leading to a drop in electricity production from EU wind turbines), and an ...

Since Belarus and Russia's first energy spat in 2004, Gazprom has increased Belarus's gas prices to near the bottom of the range it charges European countries, minus delivery costs. It has also built other pipelines to deliver its gas to Europe--namely, Nord Stream and TurkStream--diminishing Minsk's bargaining power in price negotiations.

BELARUS The EU4Energy Programme, funded by the European Union, has been working with Belarus since 2016, helping to strengthen legislative and energy regulatory frameworks, improving the quality of data and statistics, and supporting evidence-based policymaking. With the help of the International Energy Agency and the Energy Charter, signi-

Energy security and energy efficiency are key to the economic development of Belarus. Through the EU4Energy Initiative, the EU supports affordable, secure and sustainable energy through more reliable energy supply, the promotion of energy efficiency, and the use of renewable energy.

Meanwhile, Russia has conducted a strategy of creeping takeover that, according to leaked documents, will undermine Belarus' sovereignty and culminate in 2030, when Belarus will supposedly join the Russian Federation. These documents outline a comprehensive, sequenced, multi-dimensional strategy in economics (building upon Belarus' prior dependence ...
