Will ExaGrid tiered backup storage go up more than 3% per year?

tion - won't go up more than 3% per year About ExaGrid ExaGrid provides Tiered Backup Storage with a unique disk-cache Landing Zone, long-term retention repository, and scale-out architecture. ExaGrid's Landing Zone provides for the fastest backups, restores, and instant VM recoveries. The tiered

Does ExaGrid provide data security?

The data security capabilities in the ExaGrid product line, including optional enterprise-class Self-Encrypting Drive (SED) technology, provide a high level of security for data at rest and can help reduce IT drive retirement costs in the data center. All data on the disk drive is encrypted automatically without any action required by users.

Can ExaGrid appliances be deployed in the backup application software?

and with ExaGrid there are no agents to deploy or manage. When comparing ExaGrid appliances deduplication in the backup application software, it is important to keep in mind that using deduplication in the backup application software typically requires greater resources on the backup

Does ExaGrid have a retention lock?

be redundant to have a separate store with retention lock. With the ExaGrid delayed delete approach, all that is needed is up to an additional 10% more repository storage to hold the delay for the deletes. ExaGrid allows for the creation of a backup data encryption attack Example Scenarios 1) Data is deleted in the ExaGrid disk-cache Landing Zone via the b

What are ExaGrid appliances?

ExaGrid appliances are comprised of Intel Quad Core XEON processors, RAID6 + Hot Spare storage using enterprise class SATA or SAS drives, and ExaGrid software. Each appliance plugs into a switch and is virtualized into a shared GRID. The media server is connected to the same switch and sees the appliances as one or more NAS shares.

What are ExaGrid disk-based backup appliances?

ExaGrid disk-based backup appliances include scale-out computing software, which virtualizes them into a single pool of long-term capacity. Capacity load balancing of all data across appliances is automatic.

ExaGrid delivers better backups using the only hyper-converged secondary storage (HCSS) for backup with data deduplication purpose-built for all leading backup applications that leverages ...

ExaGrid is unique in its approach to backup storage security. In addition to our comprehensive security with ransomware recovery, ExaGrid is the only solution with a non-network-facing tier (tiered air gap), a delayed delete policy, and immutable data objects.
