This milestone represents a substantial reduction in the environmental footprint of our valued partners, helping them operate more sustainably and meet their green energy goals. At Fibon, we're proud to drive positive change and contribute to a cleaner future, one installation at a time.

Better Energy's Lidköping Solar Park, located in Sweden's Västergötland region, is set to generate 24 GWh of renewable energy annually, powering around 4,800 homes. It is the country's second-largest solar park, following the grid connection of the Studsvik Solar Park in October 2024, which is expected to produce 25 GWh annually. Together, these projects contribute ...

At Fibon Solar, we provide a full range of services designed to help you transit seamlessly to clean, renewable energy. From consultation to ongoing support, our comprehensive offerings ensure that your solar power system is tailored to meet your specific needs, delivering reliable energy solutions for homes, businesses, and industries.

Through its Westbrooke Renewable Energy Alternative strategy, Westbrooke has concluded a dynamic funding transaction with Fibon Group. This initiative provided essential capital to 11 Solar Power and BESS projects for the financial year ending 29 February 2024, marking a significant milestone in advancing green energy initiatives within the region.

3 ???#0183; The Danish renewable energy company said the two facilities have delivered nearly 50 MW of solar capacity in Sweden in 2024. At the time of the commercial operation date, ...

DAWN is the name of the project in which Midsummer will build a 200 MW factory for the production of thin film solar cells in Sweden starting in 2026 with the support of the EU. The European Union sees the DAWN project as one of the key projects in Europe that can offer a short term and long-term impact on avoiding carbon emissions in the EU.

Based on the knowledge that high-energy particles from solar storms can disrupt electrical equipment, Kanellos and his colleagues hypothesized that they could also affect the functioning of the heart's electrical system. To test that idea, the investigators combined data on 1,780 patients who presented to their hospital with new-onset A-fib ...

We are thrilled to be working on a solar project at a distribution centre! This industrial building made an investment in our long-term solar system, and it can now effectively receive power.
