Our focus lies in the development, sales, and production of household energy storage batteries, commercial &

Is industrial production a good idea for batteries in Finland?

Industrial production is not the be-all and end-all for batteries here in Finland. Other companies, such as Finnish renewable material producer Stora Enso, are coming up with novel solutions. The company has signed an agreement with Swedish battery developer and producer Northvolt to develop wood-based batteries.

Is battery power a green solution for Finland?

Numerous innovations have thus emerged in Finland across various sectors to help reach these goals, yet the omnipresence of battery power in meeting the needs of wider green ambitions has placed greater emphasis on developing value chains for such that don't drain the Earth's resources.

What are some small-scale battery innovations in Finland?

Other smaller-scale battery innovations in Finland are also gathering momentum. Polar Night Energy and Vatajankoski recently teamed up to create a sand-based thermal energy storage system. In what is touted as a world first, the solution converts electricity to heat which is stored in the sand to be used in a district heating network.

What is Finland's battery strategy?

Another goal of Finland's battery strategy is to seek out new customers and create commercial opportunities for Finnish battery companies predominantly in Europe and the Nordic countries. Recent news from the west coast of the country aligns with this focus.

The battery, which stores heat within a tank of sand, is installed at energy company Vatajankoski's power plant in the town of Kankaanpää, where it is plugged into ...
