Power electronics for PV modules, including power optimizers and inverters, are assembled on electronic circuit boards. This hardware converts direct current (DC) electricity, which is what a solar panel generates, to alternating current (AC) electricity, which the electrical grid uses. Learn more about how inverters work.

Tongwei Solar (TW-Solar) holds the title of the largest solar panel manufacturer globally and is the only solar panel company on the Fortune Global 500 list. With its headquarters in China, TW-Solar is renowned as the largest polycrystalline silicon producer and for its extensive production capacity at 80GWp per year.
