Japanese company J-Power has put in a A\$380.9m (\$248.7m) bid to fully acquire Australian renewables developer Genex Power. Genex said in an investor update on Monday that it has received a non-binding, indicative ...

Genex Power has successfully reached financial close for the 50MW Phase One of Kidston solar project in Australia. For the financial close, Genex has entered into a debt funding arrangement for \$100m with French financial services company Société Générale (Soc Gen) and Australian Government-owned Green Bank Clean Energy Finance Corporation (CEFC).

The PPA is subject to financial close by Genex on the project by the end of 2024 and Fortescue's final investment decision on its Gibson Island project by the end of 2023. Genex and J-Power are committing to the first stage of the project with a minimum capacity of 450MW. The PPA is expected to account for 75% of the revenue stream.

GENEX plans for the future include expanding their product line to cater to a wider range of clients and exploring new markets where ginger is a popular ingredient. With their commitment to providing customized and reliable after-sales services, GENEX is well-positioned to continue leading the way in ginger processing technology

Japanese company J-Power has put in a A\$380.9m (\$248.7m) bid to fully acquire Australian renewables developer Genex Power. Genex said in an investor update on Monday that it has received a non-binding, indicative proposal from J-Power to acquire all the company"s ordinary shares for A\$0.275 per share. Genex added that the proposed deal also ...

The Northern Mariana Islands, officially the Commonwealth of the Northern Mariana Islands (CNMI), [a] [11] is an unincorporated territory and commonwealth of the United States consisting of 14 islands in the northwestern Pacific Ocean. [12] The CNMI includes the 14 northernmost islands in the Mariana Archipelago; the southernmost island, Guam is a U.S. territory.

The Northern Mariana Islands, together with Guam to the south, compose the Mariana Islands archipelago. The southern islands are limestone, with level terraces and fringing coral reefs. The northern islands are volcanic, with active volcanoes on several islands, including Anatahan, Pagan, and Agrihan .
