As an organization, MN8 Energy is an origin source of renewable energy for the enterprise customers we serve. Our decarbonization solutions, including solar, battery storage and electric vehicle charging, spread energy from this point of origination to the customers that utilize the power we generate.

First, enterprise customers were beginning multi-decade decarbonization journeys. Second, declining costs of renewable energy would disrupt the traditional power grid. With these insights, we embarked on a mission to serve enterprise customers with the renewable energy and services that they need on their journey to a decarbonized world.
