But be careful: because Jinko panels are relatively low cost, they can sometimes be offered by retailers who are operating towards the bottom of the market. A good solar power system needs a lot more than a good brand of solar panels. A high quality installation is crucial. Jinko solar panels, well installed, should offer decades of cheap energy.

Jinko Solar uses N-type cells and tiling ribbons. Jinko Solar actively works with n-type cells and tries different panel designs with them. Historically, p-type cells were more popular. Engineers designed panels with the idea of using them in space, and p-type cells are more resistant to space radiation and degradation.
