In its bid to encourage a higher penetration of renewable energy usage on the island, the newly formed Public Utilities Regulatory Commission (PURC), has launched a "self-generator programme", which will ...

Use solar energy to power your home and reduce your electricity bill. By installing solar, sunlight would be used to power your premises at a reduced cost. Power Shift provide solar systems for commercial and residential applications.

For over two decades, Grenlec has advanced renewable energy in Grenada. Grenlec's Customer Renewable Energy Interconnection Programme and multi-site projects represent an innovative approach to increasing solar energy generation while overcoming the challenge of securing suitable, readily available land.

If you are considering installing an off-grid solar system in Grenada, it is important to work with a qualified solar installer to ensure that the system is properly sized and installed. Here are some tips for choosing an off-grid solar installer in Grenada:

This programme is intended to give power producers in Grenada the ability to own solar plants to produce renewable energy that can then be sold to GRENLEC. Most of Grenada's energy is produced from thermal generator plants, and over one hundred and fifty million dollars are spent on fuel for these generators annually.

If you are considering installing an off-grid solar system in Grenada, it is important to work with a qualified solar installer to ensure that the system is properly sized and installed. Here are some tips for choosing an off-grid solar ...

Use solar energy to power your home and reduce your electricity bill. By installing solar, sunlight would be used to power your premises at a reduced cost. Power Shift provide solar systems for commercial and residential ...

A solar electric system converts sunlight into electricity using solar cells. Solar panels can be mounted on rooftops or the ground, and convert particles of light energy, known as photons, into direct current (DC) electricity. An inverter changes DC power into alternating current (AC) to power your home or facility. Solar is a proven technology.

In its bid to encourage a higher penetration of renewable energy usage on the island, the newly formed Public Utilities Regulatory Commission (PURC), has launched a "self-generator programme", which will provide opportunities for persons to produce solar energy for personal use, as well as an avenue for the sale of excess energy to the ...
