

Our solar panels and systems are designed using the latest technology to ensure maximum efficiency and longevity. We understand the unique environmental conditions in Bangladesh and have tailored our products to withstand the challenges of the region, providing reliable energy solutions for years to come.

Now, the government and the private sector are working together to scale up solar generation to ensure energy security and to cut both emissions and fuel-import costs. Masrik Solar, Armenia's first grid-scale solar photovoltaic (PV) project, is a key element of that strategy.

G-Tech Solution Limited (GTSL) is one of the leading professional solar engineering corporation in Bangladesh. G-Tech Solution Limited (GTSL) is one of the leading professional solar engineering corporation in Bangladesh. We specialize in designing and development of the solar energy generated (photovoltaic or PV) electricity projects. Providing Outstanding Customer ...

GTEC Training, have partnered with SolarEdge, a global leader in smart energy solutions, to launch an innovative joint practically focussed course aimed at advancing expertise in solar energy. This collaboration marks a significant milestone in empowering professionals with cutting-edge knowledge and skills crucial for the renewable energy sector's growth.

A GTech Energia Solar é uma empresa especializada em propor soluções em energia solar fotovoltaica para residências, comércios e indústrias. Com sede em Fortaleza/CE, a GTech possui em seu portfólio: consultoria, projetos fotovoltaicos, homologação de projetos na concessão de energia, manutenção e instalação de equipamentos fotovoltaicos.

Solar Powered Potable Water Production . G-Tech has partnered with Source Global to integrate the Source Hydropanels into our waste conversion units and landfill elimination systems providing local communities a viable potable water source. 250 Gals/Day. 660 Gals/Day. 1,300 Gals/Day.

This qualification is designed to upskill learners in the installation of solar PV modules on roofing, encompassing knowledge and understanding of market demand, building regulations compliance, solar PV theory, and practical installation techniques. This qualification is designed in collaboration with GTEC and Sandtoft to support the ...

The use of solar energy in Armenia is gradually increasing. [2] In 2019, the European Union announced plans to assist Armenia towards developing its solar power capacity. The initiative has supported the construction of a power plant with 4,000 solar panels located in Gladzor .
