

Guam solar assistant home assistant

Does home assistant integrate with OpenWeatherMap & solar assistant?

I already had Home Assistant integrated with OpenWeatherMap and Solar Assistant. Yesterday I setup an automation with an OpenWeather Trigger to have Solar Assistant change the Growatt to Utility Priority to fully charge the batteries at 50% precipitation forecast.

Does solarassistant integrate with home assistant?

SolarAssistant can integrate with Home Assistant via MQTT and supports the Home Assistant auto discovery protocol.

How do I install solar optimizer in home assistant?

Install HACS. This way you get updates automatically. Add this Github repo as a custom repo in HACS settings. Find and install "Solar Optimizer" in HACS and click "Install". Restart Home Assistant. Then you can add the Solar Optimizer integration in the integration page. You can only install one Solar Optimizer integration.

Can solar assistant integrate with Shelley?

Real-time charts, analytics and power management from via a Raspberry pi - the most powerful, cost effective device on the planet. I see that I can add a current transformer setup with Shelley, but I'd really love for Solar Assistant to integrate. I'm attaching a small typical screenshot of SA, for those of you not familiar with it.

Does home assistant work with Huawei solar?

It works! Maximum respect! I can't connect Home Assistant via Huawei Solar, although it works correctly via Fusion Solar.

How do I convert a home assistant sensor to kW?

Customise with appropriate Home Assistant sensors for today's total solar generation and solar panel PV power output. The chart assumes that Solar PV sensors are in kW, but if some are in W, add the line transform: "return x / 1000;" under the entity id to convert the sensor value to kW. Reveal code

Home Assistant (<https://>) Integration component. This custom component integrates the Solcast PV Forecast for hobbyists into Home Assistant. It allows forecast visualisation in the Energy dashboard, and ...

Solar-Log The Solarlog integration Integrations connect and integrate Home Assistant with your devices, services, and more. uses the open JSON interface on Solar-Log PV monitoring systems to get details from your Solar-Log device and integrate these into your Home Assistant installation. With the integration you may monitor the solar power production and power ...

@Anders57S after my post I realised that I forgot to mention I have a Pi running solar assistant via the RS485 port this is my method of control. I also noted that the growatt inverter solar assistant had a bug which means that you cannot select battery first, if you select Grid First in the automation it selects battery first on the actual inverter. Took me a while to ...

I am trying to get Solar Assistant set up to monitor and control my Growatt inverter from HA. I have downloaded and written to an 8GB micro-SD card the 64-bit version of Solar-Assistant, and plugged it into a Raspberry Pi Zero 2W. I have acquired the necessary USB/RS485 adapters and plugged them into the Pi, and the other end into the RS485 socket ...

automation with an OpenWeather Trigger to have Solar Assistant change the Growatt to Utility Priority to fully charge the batteries at 50% precipitation forecast.

I have two Growatt inverters that are working great for the past 6 months. The Growatt integration has been less great. Most of the time it is working fine, but as soon as I loose internet connection or something goes wrong with the Growatt server, I loose functionality with my automations. This has happened a couple of times already. I have just discovered Solar ...

The Zeversolar integration Integrations connect and integrate Home Assistant with your devices, services, and more. uses the local device IP to get information like the current power and today's total energy production. This integration Integrations connect and integrate Home Assistant with your devices, services, and more.

I am quite new to Home Assistant. I managed to integrate the SUN2000 5KTL inverter via Fusion Solar in Home Assistant, but the data comes with a delay of up to 10 minutes. I bought a dongle and the installer installed it. I told him to set the inverter so that I can connect via Huawei Solar from Home Assistant.

I have two RPi"s with installed Solar Assistant (Solar software that sends MQTT data, locally). I want both of them to be connected to my Home Assistant (also installed locally). However, after configuring one of the devices in HA MQTT, I can't add the second one, I've got message "Already configured. Only a single configuration possible." Please advice?

I am quite new to Home Assistant. I managed to integrate the SUN2000 5KTL inverter via Fusion Solar in Home Assistant, but the data comes with a delay of up to 10 minutes. I bought a ...

Solar Assistant is a solar system monitoring and remote control app. It can also be used for home automation and load control. I am using this poll to measure it's popularity on the forum. I have never used it before, but am curious how many people are using it.
