The Energy Policy 2020-2050 established that the vast majority of Guernsey's energy supplies will come from clean, low carbon sources by 2050 at the latest, local renewable generation will be encouraged and residual emissions will be offset. In order to deliver this, the six following objectives were agreed:

# Guernsey renewable energy company in dubai

The import cable alone does not meet the islands electricity needs when energy demand is at its greatest. The GJ1 cable can provide 100% of Guernsey's energy needs in summer and around 75% in winter, so the power station is still required as both a top-up for the winter peak periods and as a back-up when the GJ1 interconnector requires to be switched off for maintenance.

This off-grid, carbon-free destination will operate entirely on solar power, saving nearly half a million tons of CO2 annually. The eco-friendly infrastructure includes renewable energy systems capable of providing clean power and sustainable water, generating 410,000 MWh per year; enough to power 10,000 households.

37 and 39 of the Renewable Energy (Guernsey) Law, 2010 b, and all other powers enabling them in that behalf, hereby order:- PART I EXEMPTIONS Power to make regulations to exempt activities etc. 1. The Department may by regulations - (a) amend section 1(2) and Schedule 1 ...
