Where can I find information about the off-grid garage?

Here on the Off-Grid Garage website, you will find easy to understand videos and instructions, explaining how to build and setup your own energy system. We will dive into topics like balancing, series/parallel connections, remote control and do battery tests to better understand how it works together.

Can you build an off-grid garage?

Building an off-grid structure is no walk in the park. It requires grit,determination,and a whole lot of elbow grease. For a year and a half,we poured our hearts and souls into this project,facing challenges head-on and celebrating victories,big and small,along the way. Let's be real here - constructing an off-grid garage is no easy feat.

What makes our off-grid garage unique?

In conclusion,our off-grid garage stands tall as a testament to the power of perseverance,creativity,and unwavering determination. What once seemed like an impossible dream is now a vibrant reality that we are proud to share with the world.

Where are genoffgrid offices located?

Our offices are located in Broome,Darwin,Kununurra and Papua New Guinea. Can't make it into the office? Please reach out via online,email or phone. In the spirit of reconciliation GenOffGrid acknowledges the Traditional Custodians of Country throughout Australia and their connections to land,sea and community.

I live in Australia and have an off grid shed/garage. My main system is fairly simple, 3 charge controllers into 4x 150ah agms and a 3kw inverter. I lack imagination when wiring things together so if I showed a pic here I'd get tomatoes thrown at me.

Things you need: Superuser access on Venus OS (I show this in the video below how to enable it) IP address of your Raspberry Pi (go to Settings and scroll down to Network or Wifi to find your current assigned IP address).

I'm using one of these on top of the house to connect all my security cameras and connect the Off-Grid Garage itself to the online world. This Wifi Access points comes in 3 different sizes/speeds and is very easy to integrate into your network.

Among the projects to be financed in this way is the deployment of 57 off-grid solar systems in Guinean villages. The systems will benefit around 30,000 households and some 100 micro and small businesses in the country.

One of the most important parts of your solar battery storage system is the inverter which transforms the DC battery voltage back to AC 120V/230V. To select the right inverter for your needs, it is essential to know your load, so basically what do you want to power from your batteries. Add up all your...

On this page, you will find some battery DIY-Kits, I have tested on the channel. These are mainly pre-configured battery cases with all accessories included. It's a battery construction set where you can build your own battery with great success and in a timely manner. Scroll a bit further down for 12V and 24V DIY Boxes....

Off-grid electrification is fast becoming the preferred means to connect people to electricity in countries like Papua New Guinea where communities are isolated, and the cost of grid connectivity is high. Research in the energy sector highlights that for much of PNG's population, off grid, decentrali sed

I have an acquaintance who trades used panels for DIYers and is giving me 10 x 250W Trina panels to use for my off grid project. Pretty much all of the panels removed cannot be used again in another grid tied project due to regulations - all equipment must be on the current standards list and older panels drop off that list each year.
