Typical value is the estimated average value considering the deviation in battery capacity among the battery samples tested under IEC 61960 standard. Rated capacity is 3785mAh for Galaxy S23, 4565mAh for Galaxy S23+ and 4855mAh for Galaxy S23 Ultra. Actual battery life may vary depending on network environment, usage patterns and other factors.

When the ambient light intensity is less than 10,000 lux or the phone's temperature rises, the HBM mode will be exited, to prevent the overconsumption of power. According to tests by vivo laboratories, the battery retains at least 80% of its capacity after 1460 complete charge cycles.
