This week five containers full of used lead-acid batteries will leave the RecycleCorp yard in Bladinere and will be on their way to a battery recycling facility in Korea. This shipment is the first of its kind out of Vanuatu under the Basel Convention.

A 200Ah Gel Battery is a type of lead-acid battery that utilizes a gel electrolyte. This design allows the battery to be sealed, reducing the risk of leakage. The 200Ah rating indicates that the battery can deliver a current of 200 amperes for one hour, or a smaller current for a longer period, making it suitable for various applications like ...

What is High Bandwidth Memory (HBM)? High Bandwidth Memory (HBM) is a revolutionary type of memory designed to meet the ever-increasing demands for higher data transfer rates in modern computing systems. It differs significantly from traditional memory types, such as Dynamic Random Access Memory (DRAM), by employing a unique architectural ...

Before a traction battery is introduced in the market, a qualification and verification of those systems is inevitable. A suitable test bench has to cover a high voltage and current range as well as a high dynamic and it should be able to execute the necessary tests as realistically as possible and in an application-oriented manner.
