

Heated storage cabinet Antarctica

Should you use a heated storage unit in a cold climate?

Heated storage is suitable in cold climates where humidity doesn't pose an issue and is recommended for items that may crack, freeze or become brittle in sub-zero temperatures, like appliances, exercise equipment and DVDs. Heated air tends to be very dry. Climate-controlled units manage both temperature and humidity.

Are heated storage units right for You?

In areas that experience extreme cold temperatures, especially in winter--heated storage units are the perfect solution. This feature maintains a safe, warm environment in your indoor storage unit when the temperature drops in your area.

Is heated storage the same as climate-controlled storage?

Like air-cooled units, heated storage isn't the same as climate-controlled storage. In regions with freezing winters, heated storage units are often used to protect belongings from cold damage. These units are designed to keep temperatures above freezing, helping prevent damage from extreme cold.

What is a heated cooled secure cabinet?

This unique heated - cooled secure cabinet can be used to store anything from defibrillators, medication, bandages, pedestrian counters, hot or cold drinks, incubation for nesting birds etc in any part of the world without the need of main power. The product is Irish, European & International patent pending for the Process, Design & Trademark.

What is a climate controlled storage unit?

Climate-controlled storage units are kept within an average temperature range year-round, helping protect sensitive belongings from extreme heat or cold. At Extra Space Storage, our storage units with climate control typically maintain temperatures between 55 and 80 degrees.

How does a climate-controlled storage unit work?

Climate-controlled units use humidity sensors and dehumidifiers along with air conditioning to keep humidity levels steady and low. While standard indoor humidity levels hover around 30-50%, most climate-controlled storage units maintain levels closer to 45% to offer consistent protection.

Heated on Demand: Just connect the battery pack, turn the sleeping bag liner on, and then adjust the temperature (high, medium, low) with a press of the button. It heated up quickly in 5 seconds, with noticeable warmth on the shoulder, back, hip, and feet areas for core-body warmth. It can last around 8 hours on low or 3.5 hours on high.

While some outdoor or drive-up storage locations may offer climate controlled units, they are most commonly found in our one or multi-story storage buildings. Because these units are located inside a building, they are kept at a comfortable temperate range between 65 and 85 degrees, just like your home .

Heated storage is suitable in cold climates where humidity doesn't pose an issue and is recommended for items that may crack, freeze or become brittle in sub-zero temperatures, like appliances, exercise equipment and DVDs. Heated air tends to be very dry.
