Choosing to build a solar panel is a step towards sustainable living. Solar energy is clean, renewable, and has a significantly lower environmental impact compared to traditional fossil fuels. By adopting solar energy, you contribute to reducing carbon emissions and help in the fight against climate change.

The Honduran company intends to purchase and install over 3,600 solar photovoltaic (PV) panels at the roof of its facility in San Pedro Sula and the IDB loan will help it do so. Invema will also invest in equipment to produce Pet bottles using up to 100% recycled content.

Honduras. The Central American country is a regional example given the boom in photovoltaic energy production, since in less than a decade, solar generation became 10 percent of the energy matrix, according to the National Electric Energy Company (ENEE). Since 2012, the country has taken steps to reduce dependence on hydrocarbons. Featured projects

This article delves into the burgeoning solar panel industry in Honduras, highlighting its supply chain centers, top solar panel manufacturers, and the main fairs that are pivotal for companies looking to make their mark in the solar energy market in Honduras.
