What is Hong Kong's first proton therapy centre?

A private hospital has opened Hong Kong's first proton therapy centre, offering cancer patients an alternative treatment promising higher precision and fewer side effects. The Hong Kong Sanatorium and Hospital (HKSH) said a woman with breast cancer was the first patient at its new centre in Shau Kei Wan last week.

Does Hong Kong have a lack of proton therapy?

Lack of Proton Therapy in Hong Kong is one of those major gaps. Compared with radiotherapy using X-rays, PT can achieve a better treatment outcome with fewer side effects.

Does Hong Kong Sanatorium & Hospital offer proton therapy?

Initial Oncology of Hong Kong Sanatorium & Hospital, shared the development of proton therapy and its clinical application. Mr Wyman LI, Chief Operating Officer of HKSH Medical Group and Director of Hong Kong Sanatorium & Hospital, said that the establishment of the HKSH Pr

Why is proton therapy so important in Hong Kong?

Proton therapy demonstrates such commitment. As cancer remains the No. 1 cause of death in Hong Kong, the Hospital has made cancer as one of its clinical priorities and is confident that greater clinical outcomes can be achieved integrating the new PT service into its comprehensive cancer programme.

How much does cancer treatment cost in Hong Kong?

The new treatment costs more than traditional radiation therapy. The hospital's proton therapy packages of 15 to 30 sessions, including for brain, breast and cervical cancer, are available at charges ranging from HK\$293,100 to HK\$613,400 (US\$78,460).

Who owns Hong Kong Sanatorium & Hospital?

Hong Kong Sanatorium & Hospital (HKSH) is one of the leading private hospitals in Hong Kong. It is owned by the Li Shu Fan Medical foundation (LSFMF), which is a not-for-profit organization.

HKSH Proton Therapy Centre is equipped with the first proton therapy system in Hong Kong. Proton Therapy is considered to be one of the most advanced forms of radiotherapy available in the world. The proton therapy system utilises high-energy and high-precision proton beams to precisely target cancer cells with minimal side effects.
