

House energy storage Guernsey

What is the maximum resale price for electricity in Guernsey?

Guernsey Electricity Limited, in accordance with section 23 (2) (b) of the Electricity (Guernsey) Law 2001, hereby gives notices that the maximum resale price at which electricity can be resold by persons to whom it is supplied is *25 pence per unit. What Is A Tariff? Put simply, a tariff calculates your bill.

Does Guernsey Electricity charge a monthly charge?

Where Guernsey Electricity is required to provide a standby electricity service for 'behind the meter' non-renewable energy installations (including CHP) with generation capacity in excess of 25kW, a monthly charge will be applied. For every kW of installed capacity, we charge the standby rate.

What is the most expensive way to heat a home in Guernsey?

Gas is the most expensive way to heat your home in Guernsey. And both gas and oil boilers are always less than 100% efficient - even at new. This means they'll cost you more to run each year they're used. Electric boilers produce zero harmful greenhouse gases around your property and are practically 100%-efficient.

Why should you choose electric heating & cooking in Guernsey?

So when you choose electric - whether to heat your home, drive around, or cook your dinner - enjoy peace of mind that your choice is helping Guernsey take a step towards a cleaner, greener future for our island. With legislation quickly changing and technology evolving, start your electric journey today by finding out more about it. Hydro

Does Guernsey have a heat pump tariff?

There is also a dedicated Heat Pump Tariff. Guernsey Electricity reserves the right to interrupt a supply to dedicated heating tariff meters, in the unlikely event of severe network conditions for up to 30 minutes in a 24-hour period, with a maximum number of interruptions being four times per calendar year.

This can be through renewable energy generation, conservation and storage. And if a building produces more energy than it needs, it can either be stored or sold back to the energy grid. ZEB status can be achieved by both homes and businesses.

Storage heaters - Super Economy 12 tariff. This refers to 12 hours out of 24 when you can run your heating using low-rate electricity. This is made up of 2 hours during the day and 10 hours at night. Storage heaters work by storing heat generated using low-rate electricity overnight and releasing that heat during the day.

Gresham House Energy Storage Fund has entered a power purchase agreement (PPA) with a subsidiary of Octopus Energy for 14 of its battery projects, totalling 568MW/920 megawatt hours (MWh), in the UK. The two-year fixed-price contracts, in place from 1 July 2024, cover approximately half of the company's 1.07GW target portfolio.
