The most important thing in to own your panels, don't lease them from an installer. If you lease the panels, they often take some of the tax incentives, and leave you with a lease that can be an issue if you sell your house. The best case is to find a reputable installer, and purchase your panels outright (or use a solar loan or HELOC).

In some cases, way more than you probably need. According to our calculations, the average-sized roof can produce about 21,840 kilowatt-hours (kWh) of solar electricity annually --about double the average U.S. home's usage of 10,791 kWh.. But remember, we're running these numbers based on a perfect, south-facing roof with all open ...
