

Hybrid energy group Singapore

Keppel pioneers digital twin and innovative hybrid AC/DC grid to manage distributed energy with NUS. Keppel Corporation, through its Infrastructure Division (Keppel), has launched a multi-pronged project for the National University of Singapore (NUS), aimed at advancing its Campus Sustainability Roadmap 2030 and the Singapore Green Plan 2030.

Energy and Power Systems (SP Group) is doing research on innovative solutions to decarbonise Singapore's grid and to foster integration of renewable energies and electric vehicles. Since 2020, EPSG has been involved in the following projects: Singapore's pathway to carbon neutrality: Analysis of new technologies (first lead institution)

Hybrid Energy Group 2023 Review 2023 was another successful year for Hybrid Energy Group, and one where we saw a massive increase in interest in renewable energy technologies, and a proud year to be shortlisted for two awards, and winning renewable energy company of the year with the Business All-Stars 2023.

developing a first-of-its-kind floating hybrid renewable energy system (RES) for operations in Singapore. The floating hybrid RES concept comprises modular offshore floating solar platforms with the flexibility to integrate other renewable energy technologies, such as ocean wave energy

We are pleased to embark on this joint study and co-creation of an innovative floating hybrid renewable energy system, to be deployed in suitable offshore locations around Singapore, with the National University of Singapore and Nanyang Technological University.

Vice President - Renewable & Hybrid Energy Anil Madh Bhatia has over 34 years working in India, Europe and South Asia in different roles providing valuable growth to the ABB Group. His vast experience covers Product development, Project Management, leading business units and managing Sales and Business Development across Asia.

Bringing their experiences from running their family businesses, they aim to establish EagleRE as a market leader of Renewable Energy in the Asia Pacific region. Our LPs are investors from Singapore, China, Europe, Saudi Arabia, ...

Bringing their experiences from running their family businesses, they aim to establish EagleRE as a market leader of Renewable Energy in the Asia Pacific region. Our LPs are investors from Singapore, China, Europe, Saudi Arabia, ...
