

# Hybrid microgrid Bonaire Sint Eustatius and Saba

Are Bonaire and Sint-Eustatius honoured?

Late last week, the good news was received that the project proposals of Bonaire, Sint-Eustatius and Saba were honoured. They are the only islands in the Caribbean whose proposals made it through the selection.

Do Islands and microgrids still rely on thermal energy?

Abstract Most Islands and Microgrids are still relying on conventional thermal generation as their primary source to cover their electric demand. Especially in remote locations electricity from PV and other renewable energies can often be produced at lower costs.

Where is Bess installed on Saba Island?

On Saba Island the BESS is installed in direct proximity of the Diesel power plant, while the PV park is on the other side of the island in 9km distance. Final commissioning was in February 2019. Tetiaroa, home of the sustainable luxury resort "The Brando" in French Polynesia, has an SMA hybrid system in continuous operation since December 2018.

Can GFI be used in genset-based Island-grids?

Integrating GFI in typical genset-based island-grids is mostly driven by achieving higher penetrations of renewable energy sources. But they may bring a lot of additional advantages to the operation of the system. Improved voltage harmonics, reduced inrush-currents and the online UPS-capability were already explained.

Does Bonaire have a utility company?

The utility company for Bonaire is Water-En Energiebedrijf Bonaire N.V. (WEB), which supplies both water and electricity to the island. WEB is a government-owned entity and is strictly a distribution utility, owning no generation of its own.

Does Bonaire have a regulated electricity sector?

In recent years, the Ministry of Economic Affairs in the Netherlands has been active in reforming the regulation of the electricity sector in Bonaire, both in terms of utility regulation and expanding generator access.<sup>13</sup>
