What is ib vogt?

ib vogt is a leading utility-scale solar development platform with a global footprint and a 20-year track record. Our OECD-focused development strategy, world-scale development pipeline, investments in BESS technology, and independent power producer ("IPP") business model strongly position ib vogt for accelerated near-term growth.

What will ib vogt do in the future?

ib vogt has one of the largest pipelines in the world of any solar company. A key objective going forwards is to continue expanding our leading independent power producer ("IPP") model to leverage more business opportunities. We expect major growth in the BESS applications segment.

Why should you choose ib vogt?

With a proven track record of project development success and a long history of profitable growth, ib vogt benefits from its strong local presence, which is augmented by a robust network of joint venture and local development partners, and profits from key relationships with customers, investors, lenders and suppliers.

Will ib vogt & nextpower V ESG buy a solar project?

ib vogt and NextPower V ESG have agreed on the sale of a 110 MWp solar project in Segovia, Spain. Construction started in March 2024, with operations set for Q1 2025. The project will generate 215.6 GWh annually, powering 55,000 homes and reducing CO2 emissions by 47,450 tons per year.

How does ib vogt's management view differ from GAAP?

This management view differs from German Generally Accepted Accounting Principles (GAAP). ib vogt has one of the largest pipelines in the world of any solar company. A key objective going forwards is to continue expanding our leading independent power producer ("IPP") model to leverage more business opportunities.
