

Intelino 530 bess Iceland

Intelino 530 BESS Suivre. Order code: INEO530BBAA. L'Intelino 530 BESS est un système avancé de gestion de l'énergie qui assure un contrôle et une surveillance sécurisés et fiables des systèmes de stockage d'énergie par batterie (BESS) afin de garantir le plus haut niveau de performance du système de stockage.

Product Description	Ordercode	CM-RS232-485	Dualportinterface	CM223248XBX	CM2-4G-GPS	4G&
GPSplug-incommunicationmodule			CM24GGPSXBX		CM3-Ethernet	
Internet/Ethernetplug-incommunicationmodule			CM3ETHERXBX		EM-BIO8-EFCP	
8additionalbinaryinputs/outputs	EM2BIO8EXBX		IDC4/4		4DCVoltage/Currentmeasurement	
EM1DC44XBDB						

The Intelino 530 BESS is an advanced energy management system providing secure and reliable control and monitoring for battery energy storage systems (BESS) to ensure the highest level of Storage System performance. Designed to respond to the needs of BESS packagers, it enables direct integration of the Battery Management System (BMS) with the ...

Our configuration software tool, IntelliConfig, now has a new version available for download. This version supports all the controllers that ComAp has launched recently - Intelino 530 BESS, IntelliSys 2000 and Intelino AMF 5. In addition, the latest IntelliConfig version now includes a new docking system feature, which enables users to customise their working ...

Intelino 530 BESS is built on ComAp's well-known and globally used platforms, similar to Intelino 5500 or Inteligen 500 G2, so the controller setup should be fast and easy for customers who already have experience with our controllers, IntelliConfig configuration software, or WebSupervisor, our cloud-based remote monitoring service. ...

The Intelino 530 BESS offers safe and reliable control for the battery energy storage system and all its key parts, and can help optimise costs, decrease noise pollution and reduce emissions. This robust energy management system enables direct integration of the Battery Management System (BMS) with the Power Conversion System (PCS) within a ...

Intelino 530 BESS is a dedicated controller for Battery Energy Storage Systems that enables direct integration of the Battery Management System (BMS) with the Power Conversion System (PCS) within a BESS. In addition, Intelino 530 BESS can also be used to control, monitor and protect the auxiliary systems of the BESS.

InteliNeo 530 BESS enables direct integration of the Battery Management System (BMS) with the Power Conversion System (PCS) within a BESS, as well as control, monitoring and protection of the auxiliary systems, ...

InteliNeo 530 BESS enables the direct integration of the Battery Management System (BMS) with the Power Conversion System (PCS) within a BESS, as well as the control, monitoring, and protection of auxiliary systems, including ...

El InteliNeo 530 BESS es un sistema avanzado de gestión de energía que proporciona control y monitoreo seguro y confiable para sistemas de almacenamiento de energía en baterías (BESS), garantizando el más alto nivel de rendimiento del sistema de almacenamiento.

For Multiple BESS InteliNeo can only connect to a single BESS for BCB control Exception: Battery Control Unit or master that controls multiple battery packs to provide: > Single node of communication to InteliNeo 5500/6000 > Sync functions between multiple batteries > Manage load sharing/ SOC/ cycling between multiple batteries

InteliNeo 530 BESS enables the direct integration of the Battery Management System (BMS) with the Power Conversion System (PCS) within a BESS, as well as the control, monitoring, and protection of auxiliary systems, including HVAC, fire detection and ...

The InteliNeo 530 BESS offers safe and reliable control for the battery energy storage system and all it's key parts, and can help optimise costs, decrease noise pollution and reduce emissions. This robust energy management system enables direct integration of the Battery Management System (BMS) with the Power Conversion System (PCS) within a BESS.

InteliNeo 530 BESS enables direct integration of the Battery Management System (BMS) with the Power Conversion System (PCS) within a BESS, as well as control, monitoring and protection of the auxiliary systems, including HVAC, fire detection and suppression, ingress detection, and E-Stop.
