Does Iraq have a natural gas deal?

In 2022, Iraq was the second-largest source of gas flaring worldwide, second only to Russia. The TotalEnergies deal aims to help Iraq harness the natural gas emitted by its oil wells, achieve a more balanced energy portfolio, and address some of its domestic electricity shortages.

What percentage of Iraq's electricity comes from natural gas?

Nearly all (about 98%) of Iraq's electricity generation is from oil and natural gas.⁶² Natural gas use in the electric power sector increased after 2016 because Iraq began importing natural gas from Iran to increase its own supplies. Hydroelectricity accounts for most of the remaining share of electricity production.⁶³

Does Iraq have a reliable electricity grid?

Now, two decades after the 2003 US invasion, Iraq has failed to see improvements in the electricity infrastructure. Although the disparity between supply and demand is widening due to population increase and rising temperatures, corruption remains the largest obstacle to a reliable electricity grid.

How much does Iraq pay Iran for natural gas?

According to Iraqi Oil Minister Ihsan Ismael, Iraq pays Iran \$8 per million British thermal units (BTU) for Iranian gas. By comparison, it is estimated that it would cost the government less than \$2 BTU to produce Iraqi natural gas.

What is Iraq's refining capacity?

Iraq's total operating refining capacity is about 1.2 million b/d.²⁷ The Iraqi government plans to reduce petroleum product imports by rehabilitating the refining sector and building new refineries, but the government has struggled in its efforts to attract the foreign investment needed in the downstream sector.

Does Iraq have a good energy system?

Today, the majority of Iraq's population has grown up in a system that has promised to deliver on energy improvements, but changes in the standard of living have rarely materialized.
