complete kits for solar PV.

A solar inverter works by taking in the variable direct current, or "DC" output, from your solar panels and transforming it into alternating 120V/240V current, or "AC" output. The appliances in your home run on AC, not DC, which is why the solar inverter must change the DC output that is collected by your solar panels.

In Ireland we stock modules in various wattage and type, suitable for domestic and commercial applications. We stock everything to install and commission your photovoltaic modules, including roofing installation kits, inverters, micro-inverters, power optimisers and more.
