Can you put a solar panel on a thatched roof?

Thatched roofs are not suitable for solar panels. There's no mounting system designed for thatch, which wouldn't be ventilated well enough underneath the panels and so would rot. And given that thatched roofs already present a fire risk, putting an electrical system on top wouldn't be sensible!

Proper preparation is key to ensuring a successful solar panel installation on a metal roof. This includes cleaning the roof surface to remove debris and applying sealants to seal penetrations and ensure waterproofing. Following manufacturer guidelines and local building codes is essential for guaranteeing a safe, effective installation process.
