

Is there any tax rebate for export of photovoltaic brackets

Will China reduce export tax rebates for solar panels and batteries?

China has announced it will lower the export tax rebate rate for solar photovoltaic products and batteries from 13% to 9% starting December 1, 2024. It also eliminates export tax rebates for aluminum and copper. The announcement was jointly made by China's Ministry of Finance and the State Taxation Administration.

How will the elimination of export tax rebates affect solar PV & batteries?

The elimination of export tax rebates on aluminum and copper, which are also used in the renewable energy industry, has already increased the prices of these metals. The reduction in export incentives could also impact solar PV and batteries.

How will a reduced export rebate affect China's PV industry?

Companies may respond by increasing export prices to offset potential losses. "While the reduced export rebate rate will have minimal impact on production costs for Chinese PV manufacturers, it is likely to provide support for overseas prices, aiding in a potential recovery," said research firm Shanghai Metals Market (SMM).

Will China phase out export tax rebates?

Some industry analysts, who spoke to pv magazine on condition of anonymity, said the tax rebate reduction is part of a longer-term strategy. With Chinese PV products dominating global markets, they said that the government might eventually phase out export tax rebates entirely.

What is the new export tax refund rate?

Refer to Annex 1 for the detailed product list. The export tax refund rate for certain products, including refined oil, photovoltaic products, batteries, and some non-metallic mineral products, will be reduced from 13% to 9%. Refer to Annex 2 for the detailed product list. The announcement will take effect on December 1, 2024.

What products will be canceled if my export tax refund is canceled?

Export tax refunds will be canceled for products such as aluminum, copper, and chemically modified animal, vegetable, or microbial oils and fats. Refer to Annex 1 for the detailed product list.

In 2024, China's photovoltaic and energy storage industries will face the challenge of a reduction in export tax rebates. Although the photovoltaic industry is affected by policies and the increase in costs may affect small and medium-sized enterprises, global demand for clean energy still supports its export growth. The energy storage industry is also facing ...

The reduction in the export tax rebate rate has led to an increase in corporate export costs and further compressed profit margins. In the current context of overcapacity in the photovoltaic industry, low product prices, and difficulty in making profits, the reduction in tax rates has a more obvious impact on obsolete
