

Isle of Man storage for solar power

Who is Isle of Man Solar?

Isle of Man Solar is a renewable energy company offering state-of-the-art solar solutions and certified and approved installation services for many products on our website. Our fully compliant engineers will carry out all the work. With Renewable energy what's to come is looking brilliant. Looking to upgrade your energy systems?

Who are Manx solar electrical?

You might be surprised! 2019 Manx Solar Electrical Ltd. Registered in the Isle of Man No. 127 689C. VAT Registration No. 004 6877 73 The Isle of Man's leading renewable energy provider, Solar PV, Heat Pumps, EV Charging, Tesla Powerwall, Solar Edge, Stiebel Eltron, Dimplex, Mitsubishi, JA Solar.

Does the Isle of Man import energy from the UK?

The Isle of Man currently imports all of its energy from the UK (with the exception of what is produced from Sulby). In all future models, the Isle of Man remains dependent on GB for the provision of baseload. This is the case even where capacity is increased by building excess renewables, as the stabilisation is still provided by interconnectors.

Can Isle of Man export electricity to GB?

There is also limited opportunities for Isle of Man to export electricity to GB, due to the excess capacity of renewable generators expected to be in operation by 2050. Isle of Man assets also have an 11% CAPEX uplift compared to equivalent UK installations, due to labour, available skill-set, transport and economies of scale.

Could the Isle of Man re-import electricity from an offshore wind farm?

With interconnectors the Isle of Man could re-import electricity generated from an offshore wind farm, allowing GB to manage the balancing. This would likely result in much lower costs to consumers. CFDs are not currently open to the Isle of Man as it is not part of the UK.

Where does the Isle of Man electricity come from?

The majority of the Isle of Man's electricity is currently sourced from fossil fuels. The interconnector is a source of carbon neutral electricity on island and also provides a route to export electricity to the GB Market.
