What is Jamaica's energy source?

This page is part of Global Energy Monitor's Latin America Energy Portal. Oil and natural gas continue to supply most of Jamaica's energy, supplemented by significantly smaller contributions from renewables. As of 2020, nearly 89% of electricity was still generated by fossil fuels.

How much electricity does Jamaica have?

As of 2020, Jamaica's installed electrical capacity was 1156 MW, supplied primarily by fossil fuels (83.73%), followed by wind (8.82%), solar (4.93%) and hydro power (2.52%).

Is Jamaica following the National Energy Policy 2009-2030?

Jamaica is currently following the National Energy Policy 2009-2030. Jamaica's December 2020 update to its NDC (Nationally Determined Contribution) aims to reduce greenhouse gas emissions by more than 25% relative to business as usual levels by 2030, with the majority of reductions coming from the energy sector.

What percentage of Jamaica's electricity is lost?

More than a quarter (26.5%) of Jamaica's electrical output is lost through poor transmission and distribution infrastructure. In 2018, the peak demand was 655 MW, and 97% of the population had access to electricity. In 2016, Jamaica consumed 2.847 billion kWh. Jamaica has no coal reserves and does not produce coal.

What does the EGC recommend for Jamaica's immigration policy?

o The EGC recommends that Jamaica implement a growth-oriented, open-door, immigration policy. o Jamaica does not have enough qualified persons to meet in the short term its growth agenda objectives.

What is the economic growth rate in Jamaica?

Over the period 1962 - 2015 Jamaica experienced an average annual economic growth of 1.6% per annum compared with average annual economic growth of 3.1 per cent for the global economy over the same period. This performance masks the relatively high GDP growth between the period 1962 - 1972.

Economic Growth Council (EGC) Chairman, Michael Lee-Chin, addressing the EGC's third quarterly Report at the Spanish Court Hotel in New Kingston on Thursday, July 27. Others (from left) are: EGC member, Paula Kerr-Jarrett, and Executive Director, Maureen Denton.

The Generation Procurement Entity (GPE) is mandated by the Government of Jamaica to develop and implement the process for the procurement of new generating capacity by means of competitive bidding, by potential independent power producers (IPPs) for sale of electricity to Jamaica's Single Buyer.
